

Elite Scholar's Academy Science Olympiad Team

2019-2020

What is the Science Olympiad Team?

Each month you will have the chance to compete against other members in science related events. Many of these events challenge you to create a device that will accomplish a specific task, such as to protect an egg from breaking in the Egg Drop or projects from the Junk Box Wars. Science Olympiad members also help with the science exchange program with local elementary schools and have the opportunity to participate in environmental projects in the community. The Science Olympiad team will also sponsor the Elite Scholars Academy's annual Science Night and the school wide science fair in December 2019.. The Science Olympiad team is for students in 6th, 7th, and 8th grade. Students in grades 9 through 12 are eligible to be student coaches.

How do I become a member?

Review this information page with your parents, and then complete the application form. Return the application form by August 23rd, 2019 to participate in this year's events. Listen to the school announcements and watch the calendar for details about each month's event. Events will also be announced on Edmodo webpage (Elite Scholars Science) or Mrs. Trapp's website (under the science club/science fair tab).

Many of the events are team events allowing you to work with other club members. Encourage your friends to join the team!

How do I participate in the events?

To participate in any event, you need to see me for event rules and sign-up by each event's deadline. You will not be allowed to participate in an event if you fail to sign-up by the deadline. Most competitions will be scheduled for Saturdays, during school breaks or after school. I will try to avoid conflicts with other school and community events. If an absence is unavoidable, you should see me prior to the event to make alternate arrangements.

Do I have to participate in every event?

No, you can choose the events and activities you want. You will earn points for participating in each event, the annual fund raiser, and other activities throughout the year. Members earning 1st, 2nd, and 3rd place in each event will receive recognition at the annual Awards Day in June.

What are the team rules?

Good behavior is expected at all science club events. Behavior that puts the safety of others at risk will result in the loss of science club privileges for the remainder of the year. Members with failing grades will be considered ineligible until those grades improve.
